(54) Title: VAPOUR DIFFUSING DEVICE

(57) Abstract: A device adapted to provide volatile liquid material to an atmosphere comprising a reservoir (1) containing volatile liquid material, a rod-like transfer member (3, 4) extending therefrom and adapted to transfer liquid from the reservoir, and at least one diffusion surface (7) adapted to receive the liquid from the transfer member and facilitate its evaporation into the atmosphere, the diffusion surface extending essentially laterally from the transfer member and comprising at least one non-integral, non-porous sheet bearing a surface capillarity (9), which sheet has an extent and a capillarity sufficient to allow an appropriate evaporation. The device is cheap and easy to construct, versatile and diffuses odour without major changes of the odour over time.
